

POLISHING MACHINE

Mopao1000B automatic grinding/polishing machine

Mopao 1000 automatic grinding and polishing machine adopts international advanced manufacturing technology in accordance with international standards . This machine has the following features such as stable and reliable performance, easy operation . wide processing range and working process of the automation etc. t is an ideal sample preparation equipment.

▼ Technical parameters

MoPao® 1000B	
Grinding/polishing disc	Φ250mm
Speed of the grinding/ polishing disc	50-600r/min (infinitely adjustable-spech) or 150r/min and300 r/min
grinding/polishing head rotation speed	5-100r/min
Loading range	5-150mewtons(N)
Sample preparation time	60-999 seconds(S)
Specimen diamete	Φ30mm
Power delivered	700W
Voltage	AC220V 50Hz
Dimension	632mm×750mm×700mm
Net weight	72kg

▼ Main accessories

- FY-5 model dripping device
- Supporting the vertical fixture with special dimension
- Diamond disc (alternative 200#-1000#)

POLISHING MACHINE

MPT semi-automatic polishing head

MPT model polishing head is one small economy products for specimen preparation. Forces on each sample can be controlled separately .so every time we can make 1,2 or 3 sample preparation other than "false" sample.MPT model the polishing can match with many kinds of grinding / polishing machine produced by WEIYI company .

▼ Technical parameters

MPT	
Power supply	220v or 380v, 50hz
Speed	50RPM
The force acting on each sample	0-40N
Preparation of sample quantity	1-3
Net weight	15kg
Power	40W
Package	450*430*220mm
Gross weight	21kg
